

Advanced Conformal Field Theory and Applications

5 September - 16 December 2011

Organised by: P. Fendley, J.L. Jacobsen, N. Read, H. Saleur, V. Schomerus, and S. Simon

Pedagogical lectures, specialised courses, and seminars aimed at graduate students and researchers on advanced topics of Conformal Field Theory and its applications.

Workshops

1. Logarithmic CFT and Representation Theory

3 - 7 October 2011

2. CFT, Topology, and Information

2 - 4 November 2011

3. CFT in Higher Dimensions

5 - 9 December 2011

Confirmed long term participants

E. Ardonne (Stockholm), V. Bazhanov (Canberra), J. Cardy (Oxford), V. Fateev (Montpellier), M. Gaberdiel (ETH), J. Germoni (Lyon), G. Lehrer (Sydney), J.L. Jacobsen (Paris), P.P. Martin (Leeds), O. Mathieu (Lyon), N. Read (Yale), D. Ridout (Adelaide), I. Runkel (Hamburg), H. Saleur (Saclay), V. Schomerus (Hamburg), G. Semenoff (Vancouver), G. Sierra (Madrid), S. Simon (Oxford), M. Staudacher (Berlin), J. Teschner (Hamburg), I. Tipunin (Moscow), V. Turaev (Strasbourg), K. Zarembo (Nordita), ...

Programme coordinated by the Centre Émile Borel of the IHP.

Registration on <http://www.ihp.fr>

Participation of postdocs and Ph.D. students is strongly encouraged.
