

## **Cargese workshop on covariation April 17-23, 2016**

### **Practical information**

**Arrival :** There will be two shuttles from Ajaccio airport to Cargese on Sunday 17th:  
- the first one will leave the airport after the arrival of the flight from Paris at **3:15pm**  
- the second one will leave the airport after the arrival of the flight from Nice at **7pm**  
The final lists of participants taking the shuttles will be sent to you on April 14.

At the airport, an employee of the bus company will wait for you and will check that everybody is on board before leaving. So do not worry if the flight is late or if you have to pick up your bag at the baggage claim!

**Housing :** you will be accommodated at the institute, in the residence Roc e Mare, in the Hotel Saint Jean or in an apartment in the village. The information about your housing location will be included in the shuttle lists sent by email.

If you are arriving by your own means (taxi, rental car) and if you are in an apartment in the village please make sure to be at the institute at 4:15pm or at 8pm (approximate arrival times of the shuttles) . There is NO WAY you can reach your apartment unless you are helped by the Cargese institute staff.

If you have a room at the institute, you will have to go to Cargese for dinners. The path from the village to the institute is very dark at night, and we strongly recommend that you bring a torch.

**Social events:** we will have a welcome drink on Monday at 6pm in front of the conference room. A dinner will be organized for all participants at the institute on Wednesday evening at 7pm.

**Payments:** participants having not paid their housing (for themselves or accompanying persons) prior to the meeting will have the opportunity to do so at the Institute by credit card or cash.

**Program of the workshop:** The workshop will start on Monday 18 at 9am. The program is available on the workshop web page.

**Departure:** there will be shuttles organized from Cargese to Ajaccio airport on Saturday 23. We will decide the schedules of the shuttles during the week.
